

Sprint Retrospective 6

Tuesday, November 16, 2021

3:18 PM

What was Good?

- (James) We had consistent progress meetings
- (Jacob) The hard deadline set by the professor allowed for us to have more accountability
- (Naeun) Communication with team members was higher than previous sprints and was very good
- (Isabel) One-on-one meetings were effective in answering everyone's questions
- (Blake) Able to finish everything assigned to me.

What was Bad?

- (James) The sprint was way too short, only four days did not allow for all the work to get accomplished or work with people's time schedules
- (James) The sprint was scheduled on a weekend which was very bad and meant a lot of work didn't get done
- (Naeun) The sprint was way too short
- (Jacob) Timing of the sprint did not accommodate everyone's schedule, not as much work got done that needed to be done

What needs to Change?

- Too Short
 - We don't plan to do anymore 4 day sprints
 - **Ex.** Sprints need to be at least 5 days, Task with priority 1 is scheduled to be completed in 1 day of starting the Sprint
- Sprint Scheduled Over the Weekend
 - **Ex.** Start a Sprint on a weekday (not Thursday, Friday, Saturday, Sunday)

- Sprints should begin Monday, Tuesday, or Wednesday
- This scheduling will maximize the amount of work done
