

What was good?

- Team Bonding (Isabel)
- Planned Feasible Tasks (Blake)
- Sprints are more productive now (Danny, Naeun)
- Constant communication (Justin, James)

What was bad?

- Isabel's sad (Isabel)
- I haven't finished all of my tasks (Naeun)
- Exams took away time from tasks (Isabel, Danny)
- Two people working on the project (Justin, James, Jacob)
- Prioritize tasks better (Blake)

What needs to change?

- Code together during normal lectures
- Making time around Exams/Project/Presentation deadlines:
 - Minimum percentage of completion in feature done before major deadlines
 - 80% unique feature complete (100% by Code Review)
 - 100% core feature complete
 - Dependencies are first priority to complete
