

# Sprint Retrospective 10

Monday, February 7, 2022

7:07 PM

## What was Good?

- good planning especially for delegating work
- proactive response to changes
- team work collaboration strong

## What was Bad?

- New team members added in the middle of Sprint affected task load

## What needs to Change?

- No changes required but good to note our reaction to the situation: we communicated with the new team members right away
  - We asked three questions important to us:
    - What is your experience?
    - What is your previous project?
    - What are your feature recommendations from your projects?
