

Sprint Retrospective 13

Monday, March 14, 2022

7:00 PM

What's Good?

- Sprint 13 Planning effectively scheduled all tasks
- Synergy is growing
- Everyone contributed
- Committed to the Main Branch, Risk Management by merging early and resolving conflicts early
- Code Review was good and gave different perspective at development

What's Bad?

- Too many merge conflicts
- Non-productive use of time
 - Merge conflicts took too long
 - Blocked teammates, waiting on commits
 - Weird organization of tasks for first half of semester project plan
- Daily Standup Meetings in Trello are not effective

What Needs to Change?

- Daily Standup Meeting
 - Text Message in a SMS group chat
 - More convenient than opening Trello
- Merge Conflicts
 - Merging changes to the Main Branch in the middle of Sprint and End of Sprint, and
 - Make Pull Requests for constant Code Reviewal, practice Individual CR, and everyone has knowledge of the system
