

FAILURE CASE DIAGRAMS

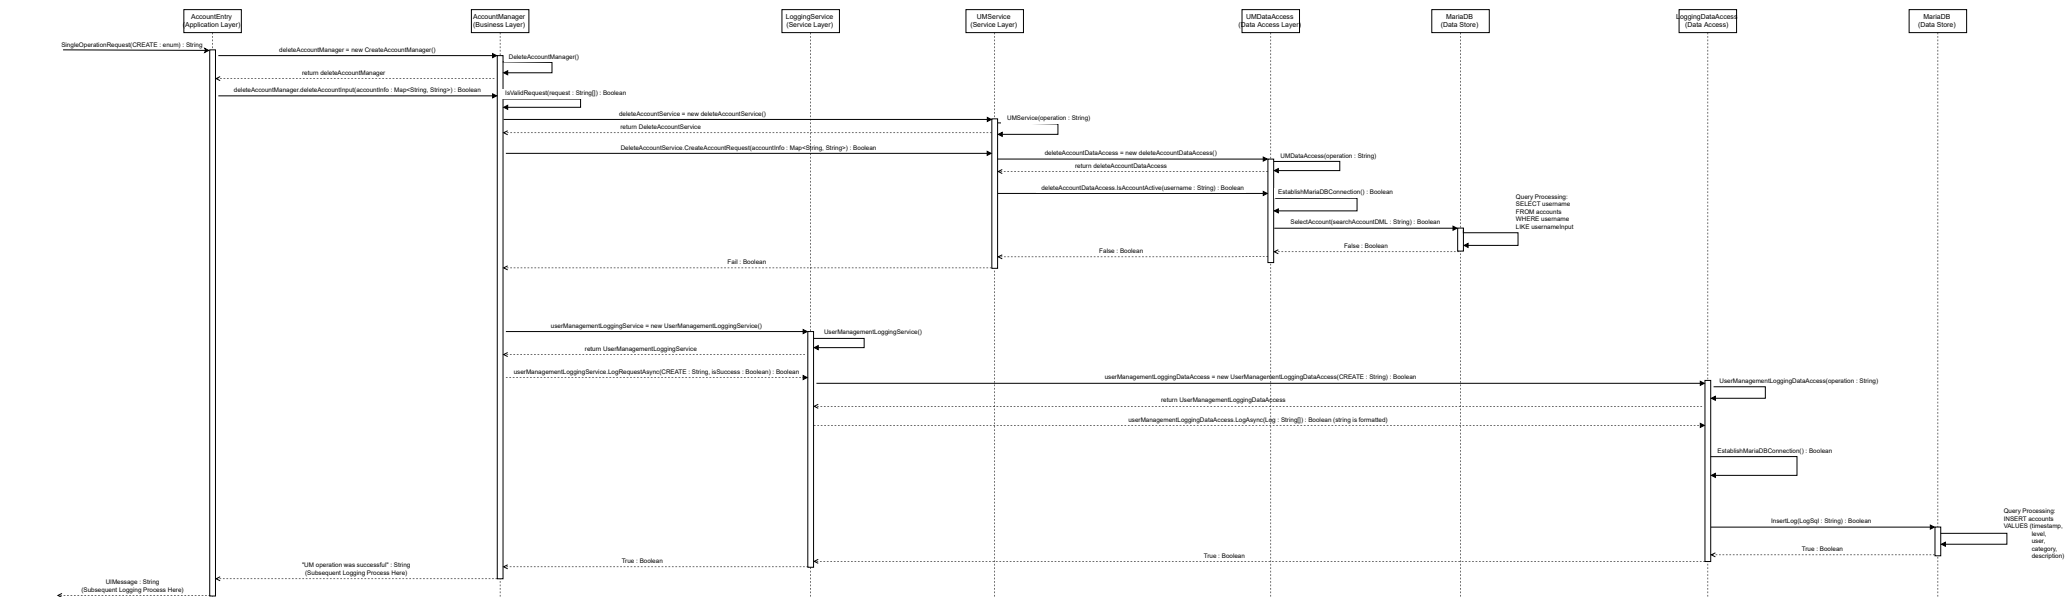

- Incorrect OML syntax
- MonoDB fails either by connection timeout or external factors

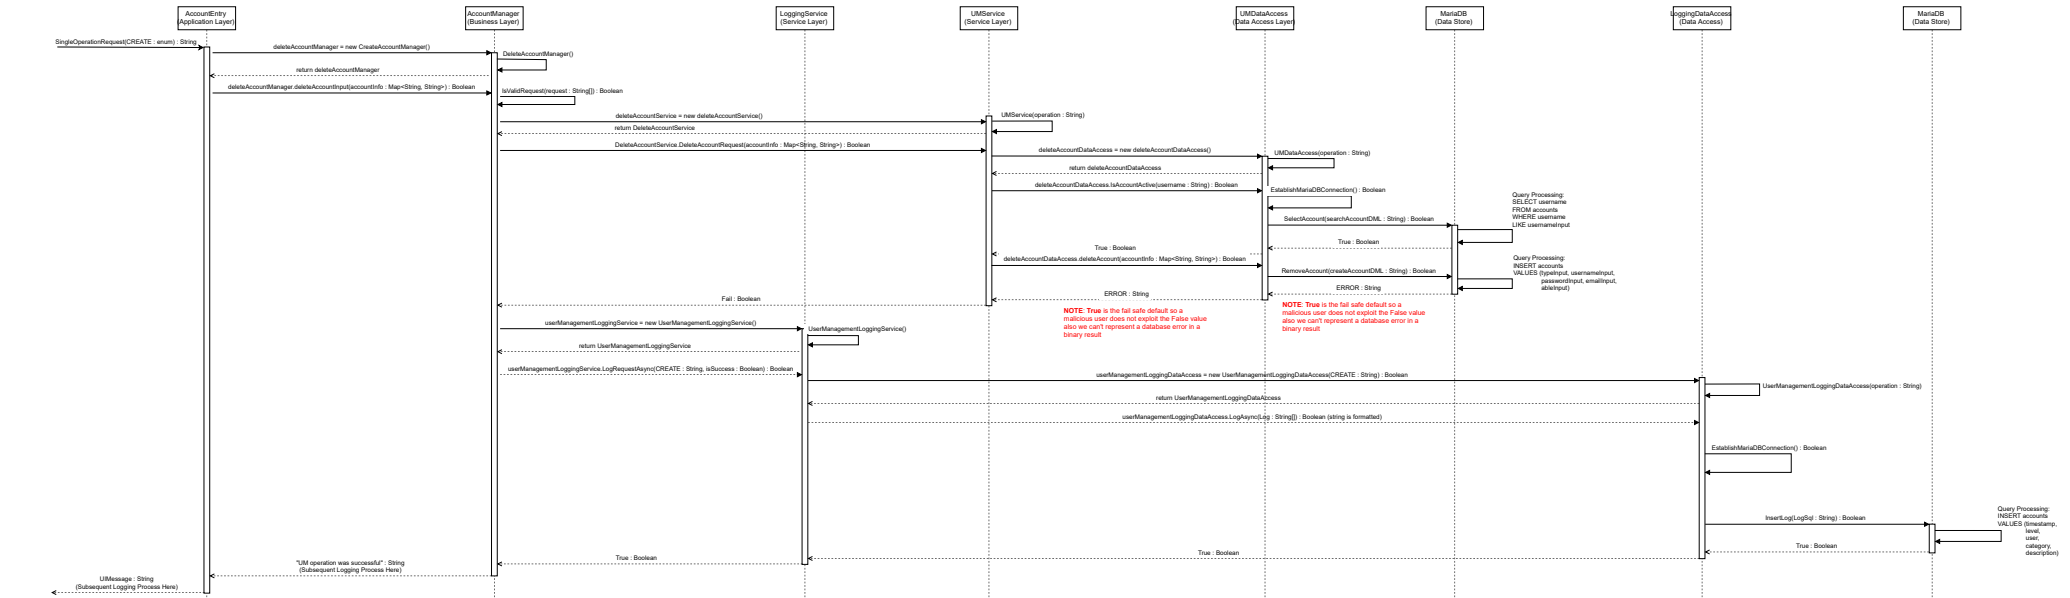

Fail Case
MonoDB Connection could not be Established
Reasons:
- EstablishMonoDBConnection() returns False
- NOTE: method to call this method only True
if still no connection after 5 seconds, log the error and end the process

- Account Does not Exist In RDMS

- Account is Not Deleted from the Data Store Due to System Error/Connection Failures

User Management Service Creation Fails
