SUCCESS CASE DIAGRAM

FAILURE CASE DIAGRAMS

- Incorrect DML syntax
- MariaDB fails either by connection timeout or external factors

Fail Case
MariaDB Connection could not be Established

Reasons:

- EstablishMariaDBConnection() returns False

- NOTE: continue to call this method until True

If still no connection after 5 seconds, log the error and end the process

- Account Does not Exist In RDBMS

- Account Is Not Deleted From the Data Store Due To System Error/Connection Failures

User Management Service Creation Fails
