Sender: James Austin Jr	**04/10/2022 10:19:25 AM**	**Isabel Guzman, Blake Del Rey, Naeun Yu, Jacob Sunia, Justin Calma, Kayla Chu, Daniel Bribiesca**	**1. Received quality feedback on my sequence diagrams and was advised to look into BLOB storage (EBS in AWS) for storing images on the EC2. Pushed Daily Scum texts to GitHub. Researched code deployment but didnt have time to deploy any code, Jacob and Danny were working on the EC2 instance though. 2. No. 3. Push Sprint Planning docs to GitHub. Review BRD for possible updates. Test storing images on Local and research how it is done on AWS EBS. After I have other school work done, start coding Data Access Layer for Community Board.**

Received	04/10/2022 12:57:10 PM	Isabel Guzman, Blake Del Rey, Naeun Yu, Jacob Sunia, Justin Calma, Kayla Chu, Daniel Bribiesca	1. Set up AWS RDS and Configured DNS to 50.x.x.x. Did not code much yesterday and was busy trying to figure out deployment. 2. Blocked with login. Please push code for login so I can work. 3. Going to work on PPA models and will try to figure out the TLS since we need it for affiliate programs

Sender: James Austin Jr	04/11/2022 12:05:21 PM	Isabel Guzman, Blake Del Rey, Naeun Yu, Jacob Sunia, Justin Calma, Kayla Chu, Daniel Bribiesca	1. Pushed Sprint Planning and Sprint Retrospective docs. Reviewed my BRD, and the only major change that needs to be done is part subscriptions. Updated my SQL for storing images via AWS EBS but may need to have a tech proposal for that, need to check with the prof. Began coding the Data Access Layer but no logic is there yet, just base code. 2. Yes, Code Migration needs to be done so I can push code for Justin and Danny. 3. Team Review today. I have an exam today. Will code more on DAL in my PostContentDataAccess file.
Received Sender: Jacob Sunia	04/11/2022 1:29:16 PM	Isabel Guzman, Blake Del Rey, Naeun Yu, Jacob Sunia, Justin Calma, Kayla Chu, Daniel Bribiesca	1. Yesterday did minimal research on the TLS and will start working on that today. 2. Not blocked 3. Will finish and add the TLS to the network server <<ec2>> and will try to test the RDS Connection string.

Team meeting where we merged everything to Main Branch 2. Not blocked 3. Edited my tables and made accurate Models/Entities for them. Will add foreign keys and then push tables to database and add in dummy data
Sender: James Austin Jr	04/12/2022 9:14:56 AM	Isabel Guzman, Blake Del Rey, Naeun Yu, Jacob Sunia, Justin Calma, Kayla Chu, Daniel Bribiesca	1. Team review went well? Merged Code Changes branch to the Main branch, now everyone can branch off of Main for their unique features. 2. No. 3. Configure a proper Front End folder Kayla and where everyone can work in. Help deploy code to the EC2 instance, maybe need to configure the ACL first. Depending on my progress with EC2 and other assignments, I can have a Subscription sequence diagram and Load Feed sequence diagram done, and continue coding the Data Access Layer for Create Post. But EC2 instance is priority atm.
