The specific metric for Event List is the
top 5 most popular events in the past 3 months

| Feature Specific (Event List) | |
|---|---|
| PK | EventID |
| PK | EventAccountUsername |
| | Event_Registration_Total |

**NOTE**: this metric can be more representative of popular events or consider popular locations to hold events, but storing data location on events will require regional data that we may not have

| Feature Specific (Event List) | |
|---|---|
| PK | EventID |
| PK | EventLocation |
| | Event_Registration_Total |
| | Event_Location |

The specific metric for Community Board is the
top 5 most popular communities in the past 3 months

| Feature Specific (Community Board) | |
|---|---|
| PK | FeedID |
| PK | FeedTitle |
| | Feed_Post_Total |
| | Feed_Post_Upvote_Total |
| | Entrance_Total |

**NOTE**: any of these three (or all) attributes can be used to measure popularity, but to keep it simple I prefer using Entrance_Total which will show the total times a particular community feed is entered into by users

Log_In_Total : total logins in that day
Registration_Total : total registrations in that day

| Admissions | |
|---|---|
| PK | AccessID |
| PK | Date |
| | Log_In_Total |
| | Registration_Total |

Display_Total : total amount a view has been displayed
Duration_Avg : ongoing average usage time on that view

| Views | |
|---|---|
| PK | ViewID |
| PK | ViewTitle |
| | Display_Total |
| | Duration_Avg |
