Sprint Retrospective 12

Wednesday, March 2, 2022   7:13 PM

Good:

- More available hours than expected
- Learned new technologies that makes work easier, good progress on tasks
- Good organization and communication

Bad:

- Worked more time than expected, but still didn't finish tasks. Poor time estimation
- Diagramming proving to be more time consuming than expected
- Wish the DARS were done
- Thought we could get done way more than we actually could
- Covid reduced Kayla's availability unexpectedly which led to less progress than hoped.
- At least for Blake, was blocked for more than half of the sprint.

What needs to change:
- We need to estimate what we can done more realistically (lower overall available hours)
- Tasks that are blocking team members need to be more prioritized
